

## BOD MEETING

September 5<sup>th</sup>, 2020

Mount Massive Lakes

### Manger Report

#### Water Flows:

- We are currently taking about 4.3 CFS
- Rains of late have helped in a big way.

#### 2020 Stocking Summary

- Stocked 7080 fish @ 2.32 lb average (16424 pounds)
- 2<sup>nd</sup> highest weight average in MML history
- Will stock Browns and Tigers in the next two weeks

#### Fish Production:

- 2021 Super catchables- Have 685 fish in pond 2. Range between 3 and 4 pounds. Will stock in November before ice on.
- 2021 Catchables- Have 16035 fish in hatchery, rainbow, and new pond. They average 1.8 lbs already and are growing fast. Rainbow pond has been a much better pond with the completion of the pipeline and adding an aerator.
- 2022 Catchables- Have 20984 fish in pasture, pond 1, and Jones pond. These fish are 3.3 fish per pound. Pond one struggled in July with hot and dry temperatures but have rebounded with cooler weather and rain.

#### Guest Revenue:

- We set our 2020 goal of \$43,200 and are currently at \$41,090.
- Will most likely hit our goal by next weekend.

#### Gillnets:

- Lakes 1, 3, 4, 5, 6, 9, 12, 13, 14, 15, 16, 18, 19, 20
- Look at condition factor and age classes

#### Spawning:

- BN (3000) and TG (12000)
- Trap in 15 for BK removal and monitoring
- Trap in 8 for spawning
- Electro fish ditches mid- September for ripe Browns (# 7, lower granite to upper granite, pond 2 to lake 6 ditch)
- Spawn all at once to keep everything the same age
- BK- Collect from 14 ditch, 15, and high lake

**Brook Trout Removal:**

- Electro fish ditches (Spring, Deep, High)
- Trap in Spring Lake

**Sick/ Vacation/ Comp:**

As of September 1, 2020

Bryan

Vacation- 18
